Swiss-Line

- Swiss style lathes are becoming a popular alternative to large lathes and machining centers in many companies.
- CPT offers a large and versatile product line of inserts and toolholders, developed for automatic and Swiss style lathes.
- Designed for economic production of parting, grooving, profiling threading and chamfering.

Polygon Inserts and Toolholders

CPT extends the Swiss Line range by offering a new type of polygon inserts and toolholders for external turning, grooving, parting and threading on Swiss-Type machines. Specially designed for small parts machining.

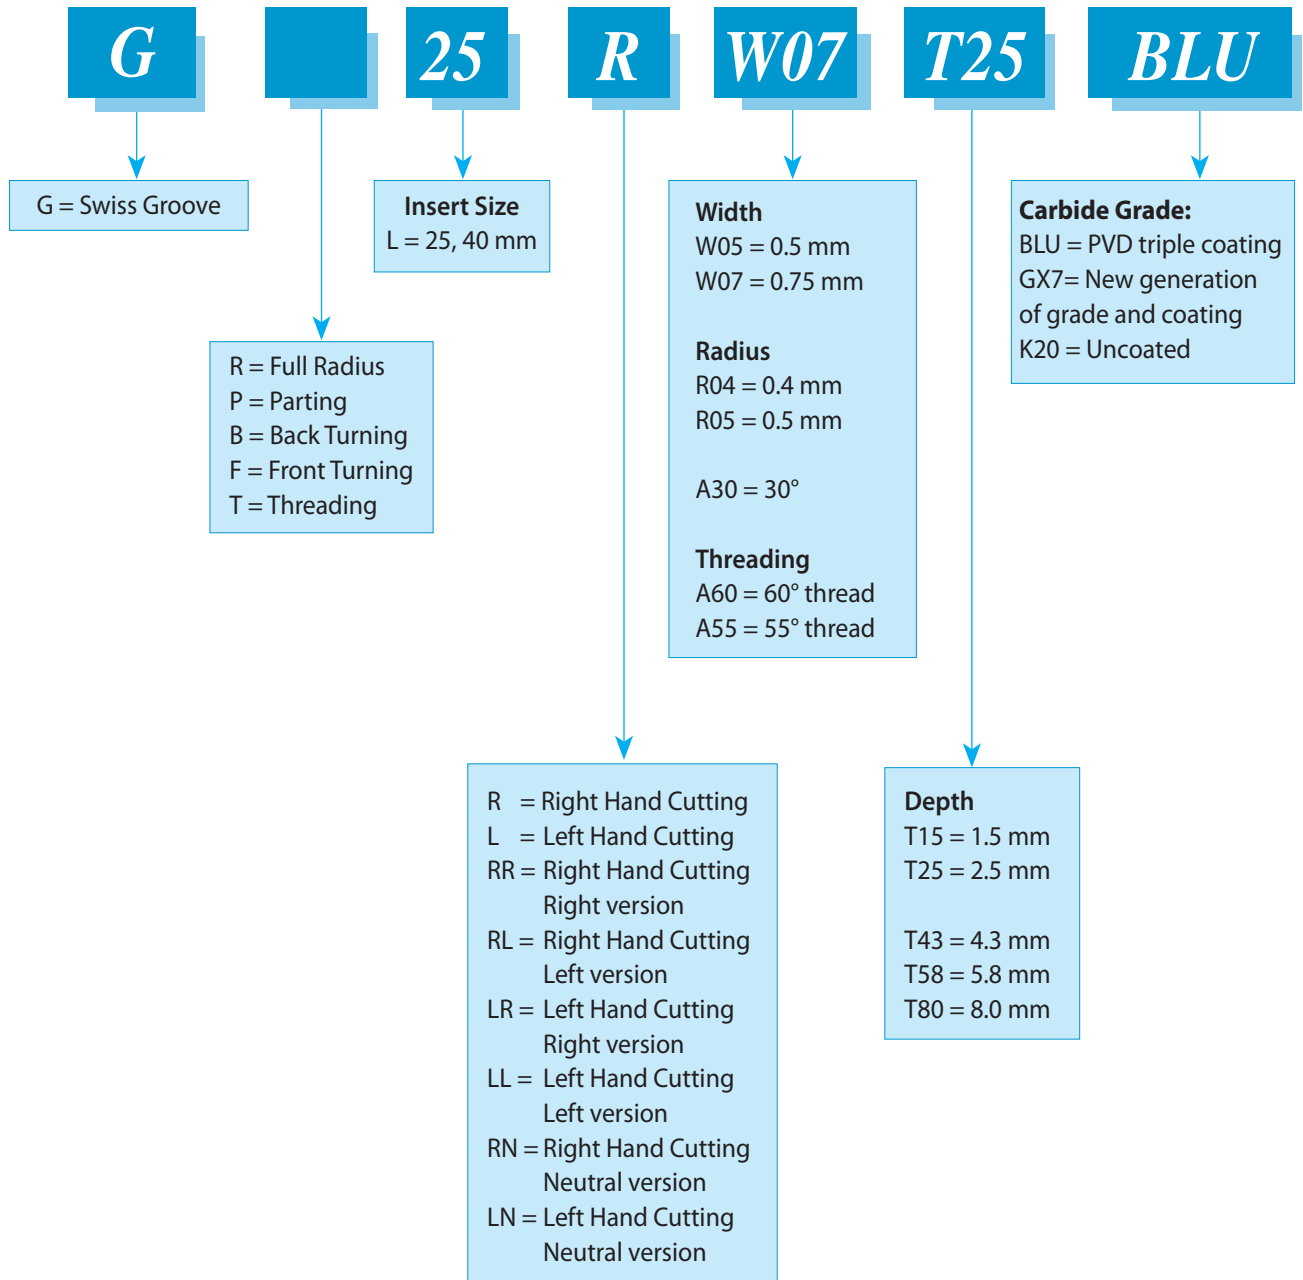

Features

- High precision ground inserts.
- All inserts can be used with same toolholders.
- A combination of the latest carbide and coating technologies guarantees maximum tool life and improved productivity.
- Compatible with a wide range of materials.
- Coated holders provide abrasive resistance.

Carbide grades: BLU, GX7, K20

Polygon Swiss Line

Carbide Grades

BLU

PVD triple layer coated Sub-Micron grade for Steel, Stainless Steels, Titanium and hard materials.

GX7

New generation of PVD triple layer coated Sub-Micron grade for wide range of materials as: Steel, Stainless Steels, Titanium and hard materials up to 58 HRc. With high toughness for optimized performance.

K20

Uncoated Sub-Micron carbide grade for Aluminum and non-ferrous materials, Stainless Steels and Titanium.

3 Cutting Edges Swiss Line Inserts and Toolholders

- Swiss style lathes are becoming a popular alternative to large lathes and machining centers in many companies
- CPT offers a large and versatile product line of inserts and toolholders, developed for automatic and Swiss style lathes
- Designed for economic production of parting, grooving, profiling and chamfering

Advantages

Advanced sub-micron grade (K10-K30) - a combination of strength, toughness, wear resistance and edge sharpness

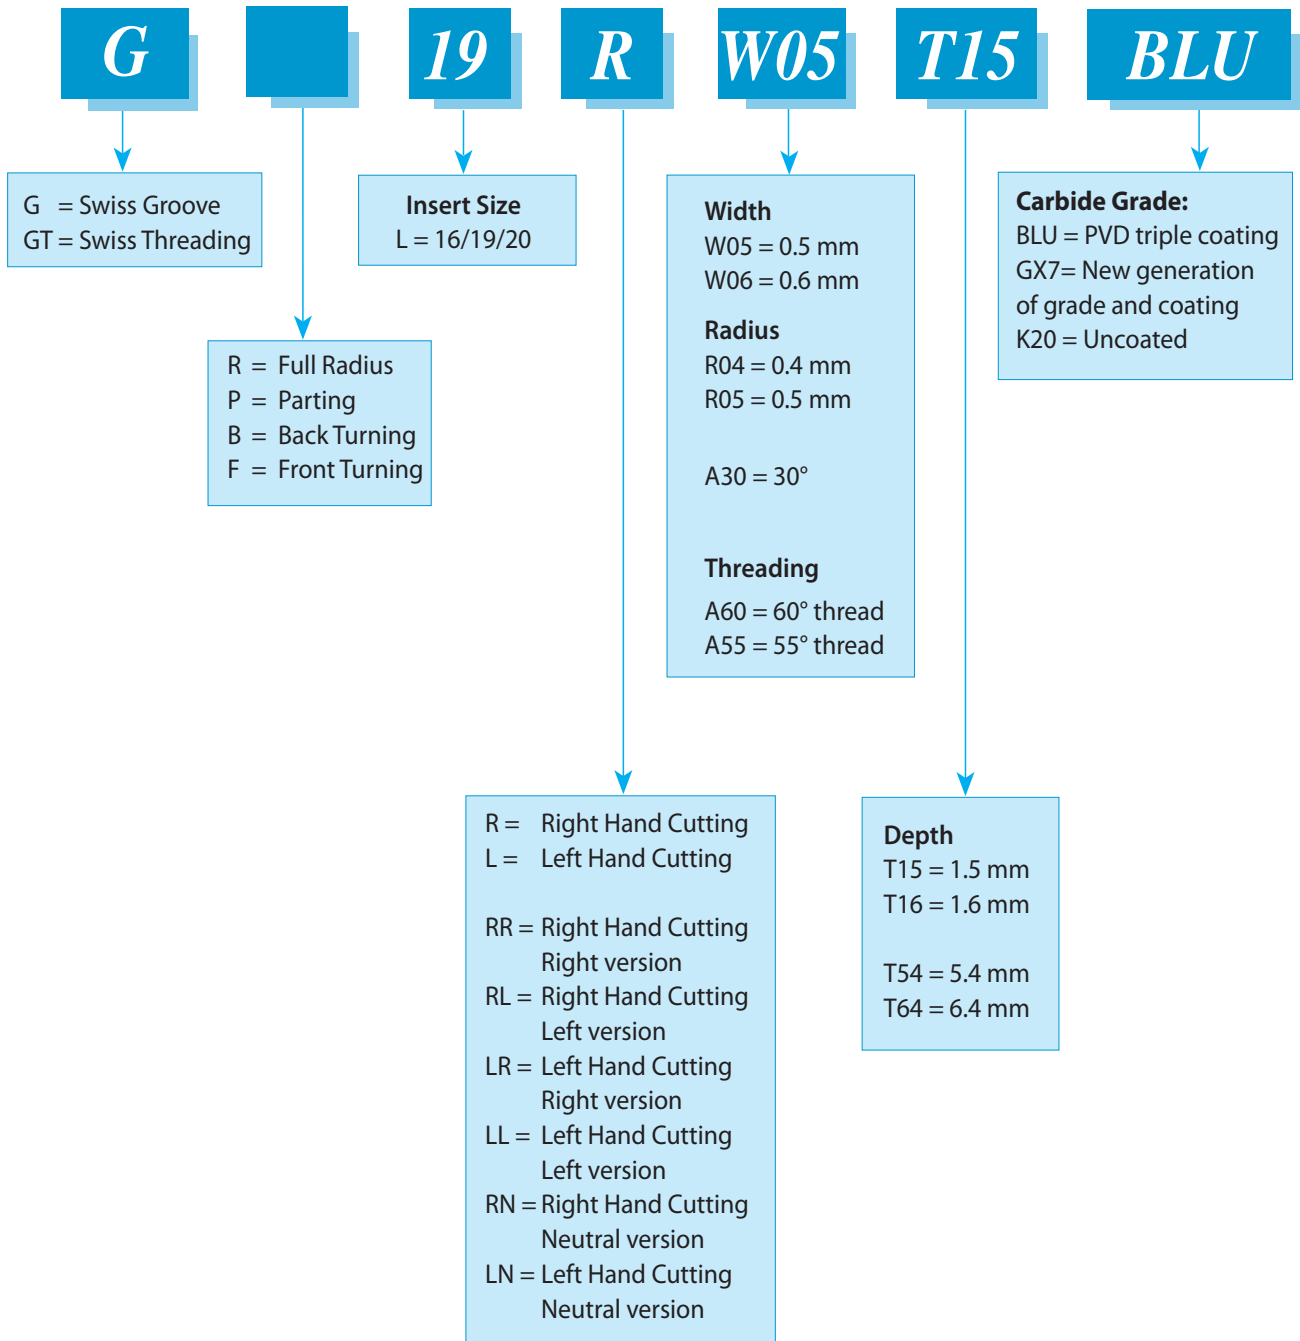

- Grounded cutting edges
- Advanced and unique PVD triple coating, for high wear and heat resistance
- For most types of material, including Stainless Steels, Titanium and Super Alloys

- Three cutting edges
- The insert can be indexed directly on the machine
- Internal coolant to the cutting edge

External Toolholders

Product Identification - Ordering Codes

- Coolant through toolholders, for external turning in Swiss type lathes machines.
- The high pressure coolant is directed towards the insert cutting edge, in order to evacuate the chips created and avoid build up edge.
- Includes a coolant connector for fast attachment on the machine.

Right Version

4 Cutting Edges G4 Turning Insert and Toolholders

For grooving, parting-off and threading applications

Benefits

- High productivity and cost efficient due to four cutting edges
- High precision thanks to the fully ground profile

Features

- Strong and stable clamping due to unique insert shape and holder pocket.
- High repeatability.
- Maximum versatility - a single holder for large range of inserts.
- Can be used with high machining parameters, and provides high surface finish.
- Internal coolant provides the coolant liquid towards the cutting edge.

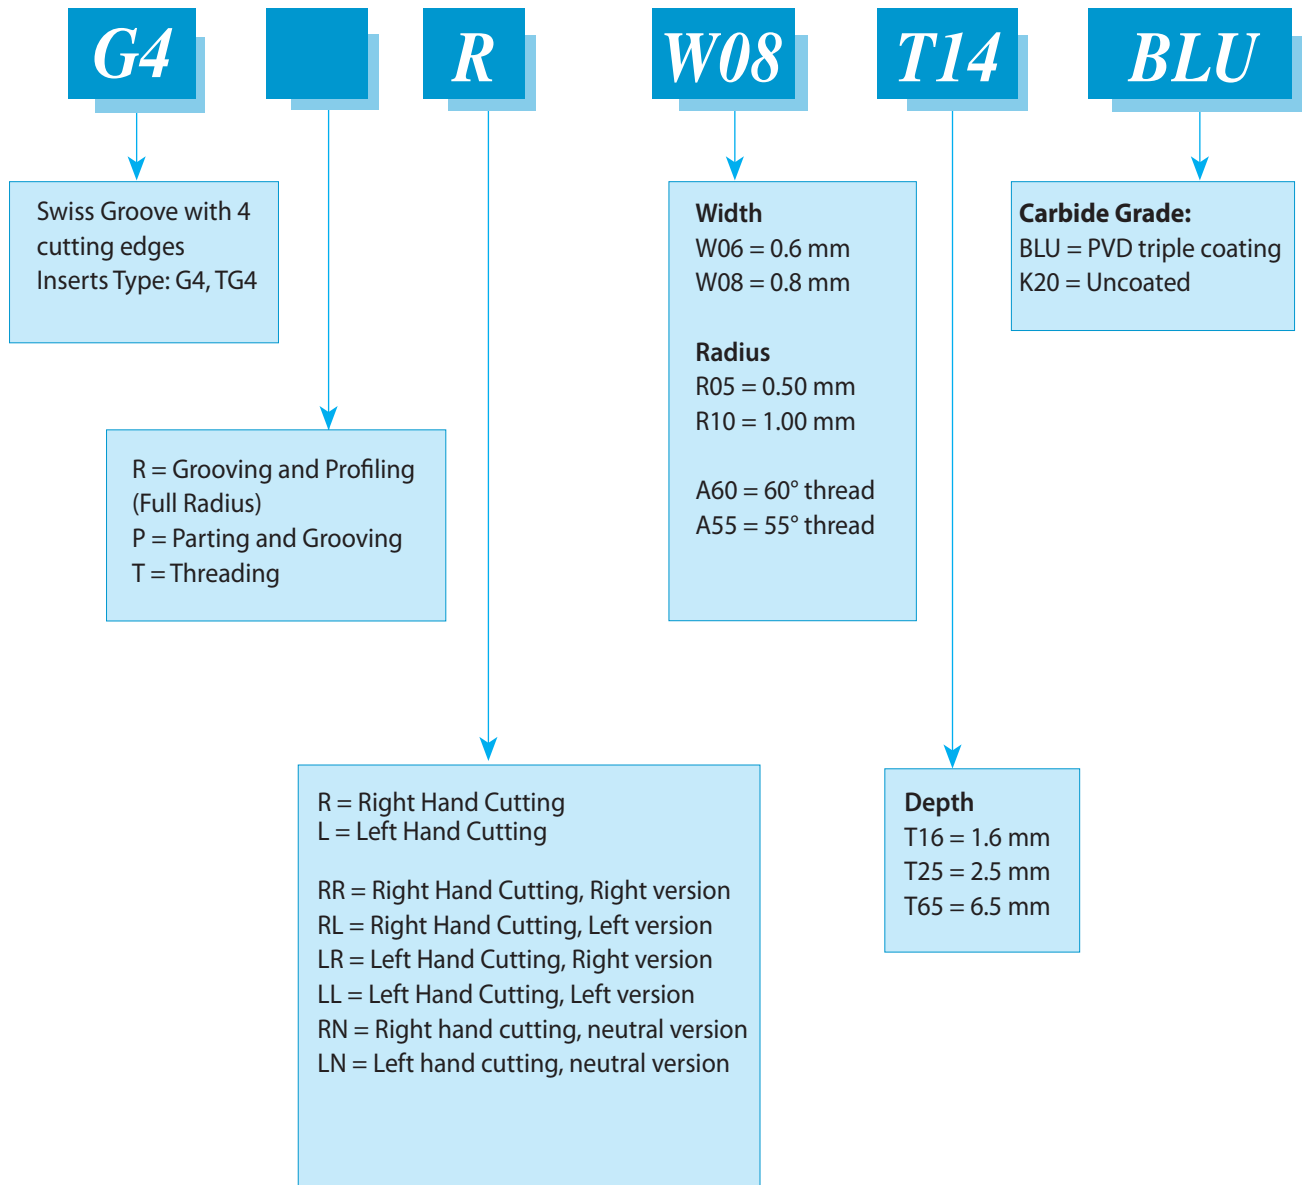

Application

- Multi-function inserts for grooving, parting, turning and threading.
- Fits to a large range of diameters, from very small applications with a thin wall up to 100 mm diameter.

Carbide grades: BLU, K20

6 Cutting Edges G6 Turning Inserts and Toolholders

For grooving, parting-off and threading

Benefits

- High productivity and cost efficiency due to six cutting edges
- One holder for all insert types - Maximum versatility
- High precision thanks to the fully ground profile

Features

- Strong and stable clamping due to the unique insert shape
- Can be used with high machining parameters, and provides high surface finish
- Internal coolant provides the coolant liquid towards the cutting edge

Application

- Multi-function inserts for grooving, parting, turning and threading
- Fits a large range of diameters from very small applications with a thin wall up to 60 mm diameter

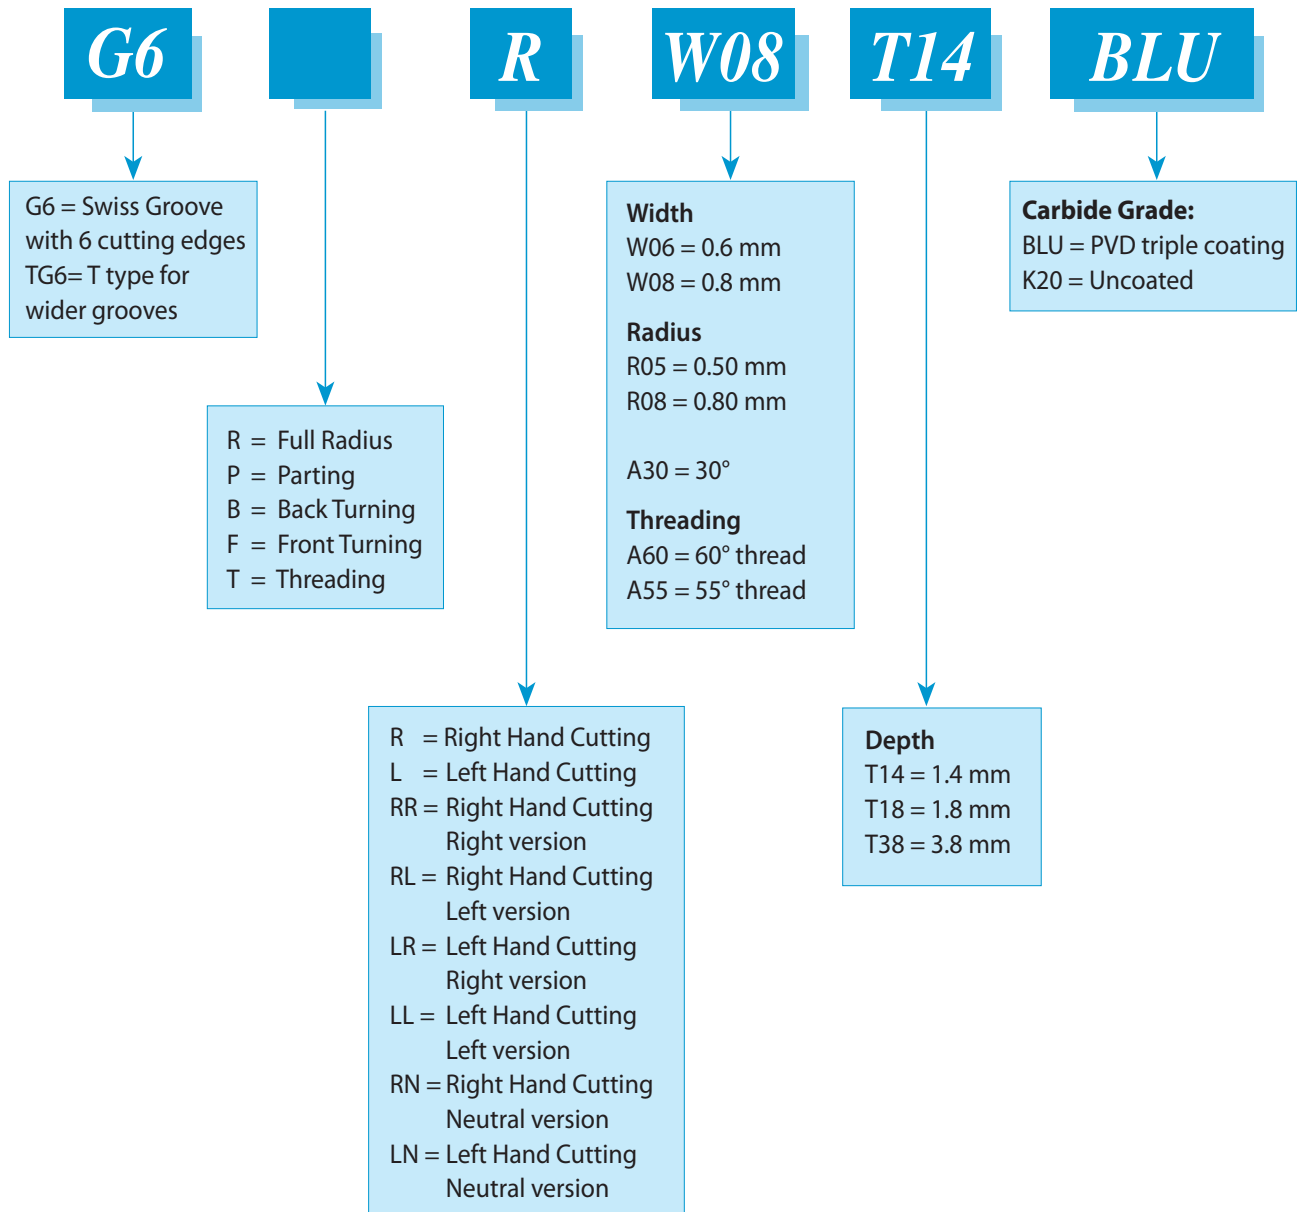

Carbide grades: BLU, K20

External Toolholders - For G6 Inserts

Coolant through toolholders, for external turning in Swiss type lathes machines. The high pressure coolant is directed towards the insert cutting edge in order to evacuate the chips created and avoid build up edge.

Includes a coolant connector for fast attachment on the machine.
